

## Отчёт по РК2 по курсу ПиК ЯП, вариант 14Б

**Задание:**

Рубежный контроль представляет собой разработку тестов на языке Python.

1) Проведите рефакторинг текста программы рубежного контроля №1 таким образом,

чтобы он был пригоден для модульного тестирования.

2) Для текста программы рубежного контроля №1 создайте модульные тесты с применением TDD - фреймворка (3 теста).

**Листинг кода:**

```
from dataclasses import dataclass
